*Fluid Flow - One source for
all your measurement, control
and filtration applications.*

- **Micro Filtration** - polymeric cartridge and porous metal designs
- **Filtration Systems** - chromatography, depth filtration, micro-filtration, reverse osmosis and ultra-filtration separation technologies; single use, backwash, blowback and regenerable filtration systems
- **Low Pressure Desiccant Dehumidifier Equipment**
- **Level Instruments** - switches, transmitters and controllers utilizing radar, magnetostrictive, RF capacitance, thermal dispersion, ultrasonic, vibrating and mechanical technologies
- **Flow Instruments** - switches and transmitters utilizing thermal dispersion and mechanical technologies
- **Magnetic Level Gages** - single and dual chamber indicators
- **Level Instruments** - level gage integrated switches and transmitters; guided wave radar, magnetostrictive and reed switch transmitter technologies
- **High Purity Valves** - and components including mixed proof, control, tank drain and relief valves
- **Ball Valves** - on/off and characterized seat control valves
- **Automation Solutions** - pneumatic electric actuators, and analog and digital positioners and limit switches
- **Precision Regulators** - industrial and high purity designs
- **Pressure Regulators** - and control valves for steam, water and gas
- **Regulators** - high capacity, self-contained and pilot-operated pressure reducing and back pressure relief valves; industrial and hi-purity designs
- **Vapor Control Systems** - tank blanketing and pilot-operated vent valves; conservation vents and flame arrestors
- **Level Gages** - tubular, flat glass and magnetic level indicators
- **Level Instruments** - boiler level trim; level gage integrated switches and transmitters; magnetostrictive and reed switch transmitter technologies
- **Sight Flow Indicators** - liquid and gas designs
- **Jet Pumps** - eductors designed for heating, mixing and pumping liquids and gases; solids transport
- **Tubular and Finned Elements for Immersion and Convection** - Defrosting coil heaters, tank heating systems, flanged & other connections available
- **Compressed Air Refrigeration and Desiccant Dryers**

- Pulse Jet Dust Collectors - standard and high pressure vacuum

- "Dual-Snap" Pressure and Temperature Switches

INVALCO

- Turbine both Gas and Liquid - positive displacement and insertion type

- Sanitary 316ss Diaphragm Valves - both manual and automated

- Magnetic Level Gages - single and dual chamber indicators
- Level Instruments - level gage integrated switches and transmitters; guided wave radar, magnetostrictive and reed switch transmitter technologies

- Flow Instruments - precision turbine meters and positive displacement flow-meters; batch controllers, flow computers and data loggers
- Pressure Instruments - Barton differential pressure indicators and switches
- Smart Transmitters - pressure, dp, temperature and flow

- Pressure Gauges - bi-met temperature gauges and thermometers

- Rotameters - high accuracy, acrylic and glass type

- Ultra Hi - capacitance, alumina oxide probes, both portable and fixed type instruments

- Analyzers - Orion on-line process monitors for water analysis

- CIP & SIP Systems - Advanced Clean-in-Place and Sterilization-in-Place equipment, accessories, and solutions for the Life Sciences and Food & Beverage Industries

- Boiler Level Trim

Adding Value to Quality Products

F L O R I D A

Fluid Flow - One source for all your measurement, control and filtration applications.
